Episode 3: *The Drowned Village (□□□□□□□□□□)*

Full Game Design & Narrative Specification Document

1. Overview & General Info

- **Title: Boon Sop:** The Unbroken Debt — Episode 3: The Drowned Village
- **Time Period:** 1932 (French Protectorate Era in Cambodia)
- **Protagonist:** Sora (□□□□□□□ - Age 24) – Navigating with her sketchbook, hurricane lamp, and the blood-stained 1925 photograph recovered from the Silver Betel Box.
- **Location:** Semi-Submerged Floating Community & Abandoned Stilt Clinic, Tonle Sap Lake, Cambodia
- **Time of Event:** Heavy Monsoon Rainstorm (2:00 AM – 5:30 AM)
- **Estimated Playtime:** 3 to 4 Hours
- **Genre:** 3D First-Person Atmospheric Survival Horror (Resource Management & Aquatic Stealth)
- **Engine Target:** Babylon.js / PlayCanvas (WebGPU/WebGL native in-browser)
- **Visual Aesthetic:** Cold dark teals, murky brown floodwaters, glistening wet PBR wood surfaces, rain-streaked screen effects, lightning flash shadows, and warm amber oil light reflections.

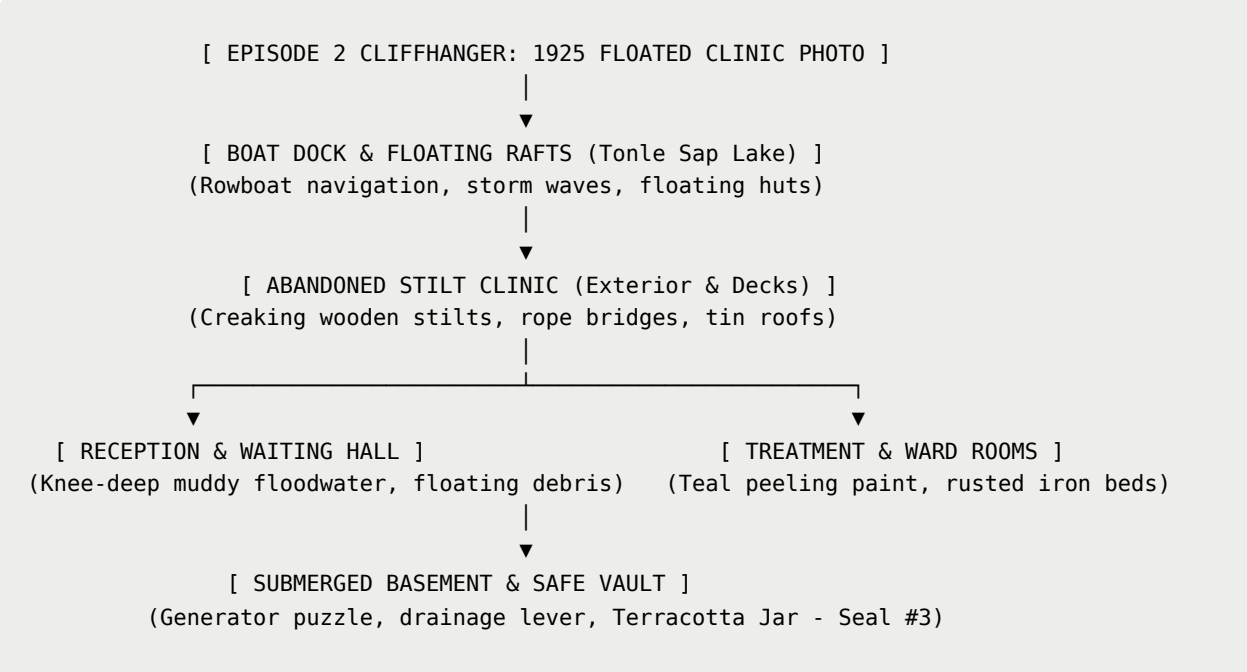

2. Character Profiles

- **Sora (□□□□□□□):** Soaked and pushed to her physical limits, Sora navigates the treacherous flooded structures using small wooden boats, plank walkways, and her keen eye for architectural spatial layouts.
- **Grandfather Pa Lok (□□□□ - Age 70):** A retired, reclusive fisherman living on a nearby isolated floating raft. He recognizes Uncle Sok's photograph and

explains the tragic history of the flooded clinic and its vengeful spirit.

- **The Chhlong Tonle (ជលង្គទន្លេ - Water Spirit):** A horrific aquatic entity—the tragic spirit of a young woman who drowned in the submerged clinic during childbirth decades ago. She glides under murky water, emerging through flooded floor openings and dripping ceiling gaps.
- **The Neak Ta Shadow (ព្រះនាគតា):** The central entity, growing more aggressive as the seals break, manipulating the rising storm surge to trap Sora inside the flooding lower chambers.

3. Environment & Spatial Layout

1. Boat Dock & Floating Rafts

- **Structure:** A cluster of rickety, floating wooden homes anchored to bamboo poles rising out of the endless black lake.
- **Props**: Small wooden rowboats (*Sampan*), bamboo oars, woven fish traps, kerosene barrels, and storm lanterns bobbing on water.

2. Abandoned Stilt Clinic (Upper Decks & Walkways)

- **Architecture**: A two-story French-Khmer medical clinic built on thick wooden stilts over the lake. Exterior walls feature faded teal paint and corrugated iron

roofs that drum under heavy rain.

- **Props**: Slick wooden plank bridges, hanging rope handrails, canvas rain tarps, and rusted medical supply crates.

3. Interior: Flooded Reception & Wards

- **Environment**: The ground floor is partially submerged under knee-deep, murky floodwater.
- **Props**: Floating patient files, glass medicine vials, rusted iron cot frames, wooden rocking chairs floating upside down, and leaking ceiling cracks pouring rainwater into the rooms.

4. Submerged Basement & Safe Vault

- **Environment**: A low-ceiling concrete and timber cellar built beneath the clinic's main stilts, completely flooded up to chest level during the monsoon. Contains an old diesel backup generator and an iron medical safe.

4. Act Breakdown & Detailed Narrative

Act I: The Monsoon Surge (0:00 – 1:00)

Narrative

Following the clue in the 1925 photograph, Sora travels by horse cart to the edge of Tonle Sap lake at 1:30 AM during a fierce tropical monsoon. The lake is wild with surging waves.

Sora hires a small rowboat from Grandfather Pa Lok, an old fisherman. He warns her that the old stilt clinic has been abandoned since a tragic medical accident in 1920, and that no local fisherfolk dare go near it after midnight:

> *"The water remembers everything, girl. The spirit in that clinic drags down anyone who steps into her dark water. Keep yourself dry, and keep your light bright."*

Sora rows through the rainstorm toward the silhouette of the creaking clinic towering over the water.

Gameplay Mechanics & Tutorial

- **Rowboat Navigation:** Player controls a small wooden boat using fluid water-physics controls to navigate between floating structures.
- **Water & Moisture Mechanics**: Walking through flooded sections slows movement speed and drenches Sora's clothes. If Sora remains in water too long, her body temperature drops and her lamp light flickers dangerously.
- **Spotlight Drying**: Sora can use fixed kerosene spotlights on the clinic walls to dry herself and create temporary safe zones that repel aquatic entities.

Act II: Whispers Under the Floorboards (1:00 – 2:30)

Narrative

Climbing onto the clinic's lower deck, Sora searches for Uncle Sok's old storage vault. She learns through wet ledger books that Uncle Sok used the clinic as a hidden sanctuary in the 1920s, storing a rare relic inside the clinic's lower iron safe.

As Sora moves through the flooded treatment wards, the temperature plummets. The water around her ankles begins to ripple unnaturally. The Chhlong Tonle manifests—emerging quietly from flooded floor openings with long, hair-draped water silhouettes.

To reach the safe vault, Sora must collect three dry brass fuses scattered across the creaking upper floors to restore power to the clinic's drainage pump generator.

Gameplay Mechanics & Puzzles

- **Aquatic Stealth:** The *Chhlong Tonle* travels exclusively through water pathways and flooded floor sections. Players must watch for water ripples and step onto dry furniture, raised wooden crates, or upper plank walkways to avoid detection.
- **Window & Roof Sealing Puzzle**: Sora must use wooden planks and canvas tarps to seal broken windows and roof leaks, stopping incoming rain from flooding key puzzle rooms.
- **Generator Fuse Puzzle:** Locating three dry fuses stored in sealed medical tins while dodging the entity by tracking the sloshing sound of wet, dragging footsteps.

Act III: The Sunken Safe & Seal #3 (2:30 – 3:30)

Narrative

Sora installs the fuses and cranks the diesel generator to life. The noisy machine vibrates through the floorboards, activating the drainage pump and lowering the water level in the basement vault.

Sora descends into the muddy basement. In the center sits the iron safe. Using clues from her sketchbook, she aligns the dial combination based on dates recorded in Uncle Sok's medical logs.

Inside the safe lies the Ancient Terracotta Water Jar (Seal #3), inscribed with protective Pali runes and filled with sanctified river soil.

As Sora picks up the jar, the main Neak *Ta* entity manifests outside, smashing the clinic's support stilts. The entire building begins to tilt dangerously into the churning lake as floodwaters rush back in.

Gameplay Mechanics & Puzzles

- **Timed Vault Escape**: Sora must climb out of the rapidly tilting, flooding basement while balancing across shifting floorboards and dodging falling debris.
- **Purification Counter-Ritual**: On the upper deck, Sora pours sanctified water from her satchel over the Terracotta Jar while lighting three yellow candles in a triangular layout around it.
- **Climax**: As the counter-mantra is recited, a blinding flash of light erupts from the jar, dissipating the *Chhlong Tonle* into harmless mist and calming the waves around the clinic.

Episode Resolution & Cliffhanger

Sora sits exhausted in her rowboat as the storm calms at 5:00 AM, revealing the pale pink hues of dawn over the lake.

Inspecting the Terracotta Jar, she breaks its clay seal. Inside, wrapped in oilcloth, is a burnt piece of dried rubber latex stamped with a French colonial seal from 1928: *Compagnie des Caoutchoucs de Kampong Cham*.

A fresh drop of blood seeps from the rubber stamp onto Sora's sketchbook map, pointing east toward **Episode 4: The Rubber Plantation**.

5. Audio & Visual Specification Sheet

Feature	Design Specification
Color Palette	Dark teal, murky brown, cold gunmetal grey, glistening wet wood, and warm amber oil light.
Post-Processing	Screen-space rain effects, screen-space water reflections (SSR), dynamic lightning flashes, lens distortion.
Light Sources	Kerosene hurricane lamp, fixed wall spotlights, distant lightning flashes, generator indicator lights.
Primary Ambience	Heavy rain on tin roofs, thunder claps, water lapping against stilts, creaking timber frames.
Horror Sound Cues	Water sloshing, wet dragging footsteps, muffled aquatic crying, diesel engine chugs, snapping wooden stilts.
UI Design	100% Diegetic. Body dryness indicator represented by wet screen vignetting; oil gauge visible on lamp; satchel sketchbook for maps.
